

Four-Place Boltac Infinity jar stirrers

NOW WITH optional TOUCH SCREEN TECHNOLOGY

NEW Infinity Stirrer from Boltac Industries in New Zealand.

More paddle power than the Boltac JarStar!

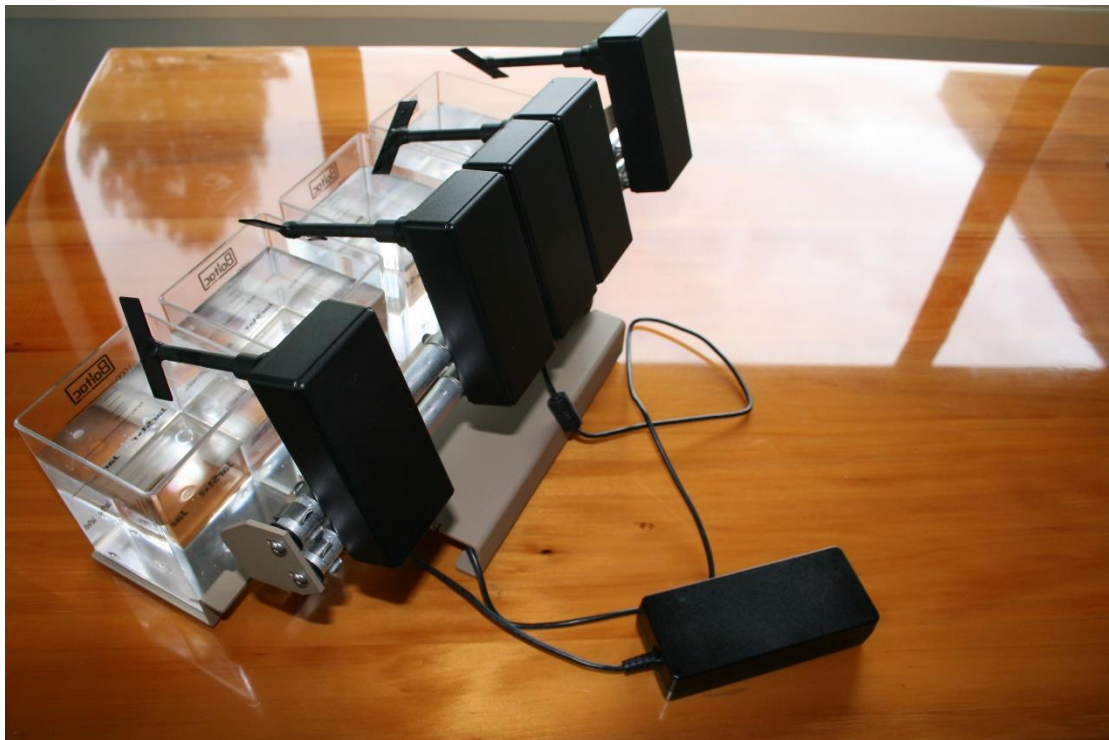

Based on the highly successful and popular portable JarMaster stirrer from Boltac Industries, the new Infinity stirrer has all the JarMaster control features PLUS more.

VERSION: 4 place.

ALL INFINITY STIRRERS HAVE BLUE TOOTH CONTROL FUNCTION!

- **Plug 'N Play.** Gone is the separate control hub with individual connection cables. **In fact, there is only one wire supplying a safe 24vdc from the power pack.**

Mock-up presentation photo only.

- **Tough jars.** Infinity stirrer has the same graduated square, almost indestructible 1 litre polycarbonate jars. Infinity has the same paddles, located in the same position within the jars as ALL other Boltac jar stirrers. Results from the Infinity stirrers can be compared directly with results from other Boltac stirrers.
- **0 to 500rpm.** More power at the paddles with less power consumption than ever before, (more power than the Boltac flagship JarStar stirrer)!

- **No mess.** Liquid from raised paddles drip directly back into the jars.
- **Super lightweight.** The Infinity stirrer can be easily carried in one hand, 3kg total weight, (not including water sample).

- **Vehicle use.** Can be operated in remote areas by connection to the vehicle cigarette lighter plug socket- optional power adaptor required.

CONTROLS:

Manual operation.

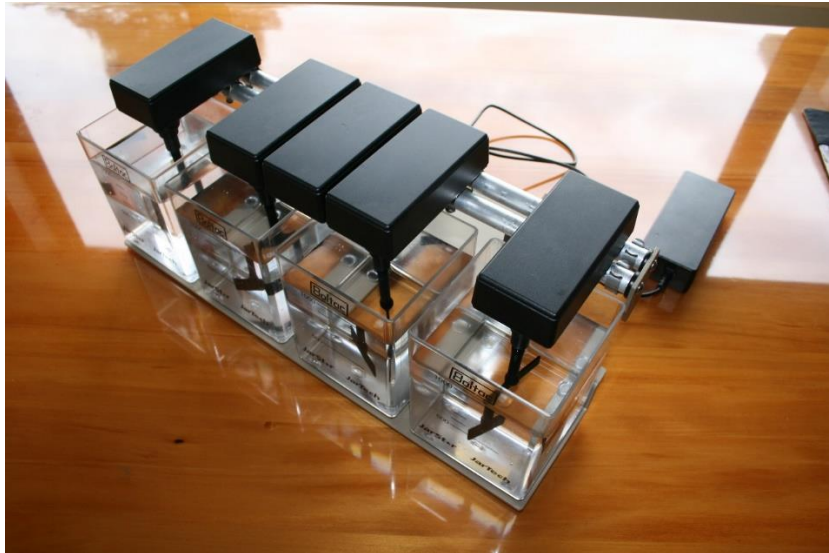

- Two-button start and stop (rpm raise/lower). 5 Pre-set speeds (incl "0").
- The G Value/Speeds are: - (rounded to nearest rpm)
- 1st press of the button 450 G - **350 rpm**
- 2nd press of the button 100 G - **140 rpm**
- 3rd press of the button 50 G - **90 rpm**
- 4th press of the button 8 G - **20 rpm**
- 5th press of the button 0 G - **0 rpm**

Manual incremental speed changes.

- By pressing and holding either the "+" or "-" button, any speed can be selected from 20 through to **500 rpm**, (that's correct, **five hundred** rpm).

Blue Tooth operation.

- All Infinity stirrers are supplied with Blue Tooth capability.
- Infinity stirrers can be controlled via touch-screen controller with sound alerts or mobile phone (program freely downloadable from App store).
- Infinity can be controlled from PC using windows via Blue Tooth
- Using Blue Tooth option, programs can be saved on device and recalled for future use- great for standardising test procedures.
- Pre-paired & programmed touch-screen controllers for immediate connectivity, immediately capable of jar testing, (plug and play)!

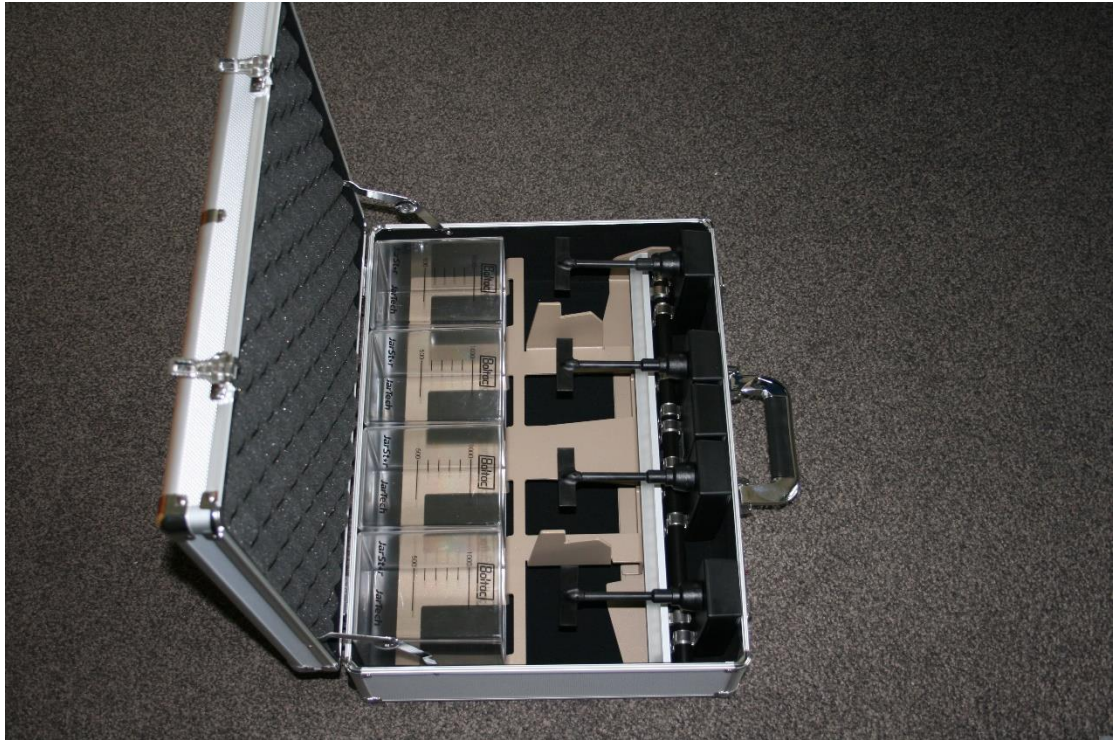

Mock-up of assembly photo only

- New “open” design provides more natural light to the jars, plus:

- Impressive new LED lighting provides light from above/behind the jars.

- Aluminium carry case provides superb protection and portability for the four-place machine.
- Lid of case is foam-padded to hold and protect the Infinity stirrer while in transport.
- Case has lockable claps closure, with combination lock provided.
- Total weight is 6kg when in the case. Case is optional.
